

Teachers and Administrators Comment on the MOST Program

"Part of our job as teachers is allowing for the creation of well rounded citizens who are productive in society...doing things that will give back to the community in some way, shape or form. The MOST Program shows our students what a community looks like and what people in the community, who care about their future, look like.

Michael Melvin
Sam Houston HS Teacher

Debbie Esperanza
Administrator, Davis MS

"We know where the students are going before they go so we can prepare some specific things we want students to notice or listen for during the trip. Upon returning to school teachers review what students learned. It gives us much greater opportunities to demonstrate why learning English, math and science is something important to their lives."

Etta Reed
Administrator, Davis MS

Since the implementation of Motivate Our Students Texas on our Campus the overall impact has been a significant increase in student attendance. That was the initial goal but we have also seen a decrease in discipline referrals and also an increase in student achievement scores. We attribute that in part to their contribution not only for the field trips but also to the guest speakers who have taken time to come and share their life experiences with our students."
